The headline

- AZUL SA filed a F-1/A registration statement for a proposed IPO.
- Shares offered: Not confidently extracted.
- Price range: Not confidently extracted.
- Proposed listing: AZUL on NYSE American.

What does AZUL SA actually do?

, and all are motivated by the opportunity to participate in our MIP (as defined below), which we believe aligns shareholders? and management?s interests. Our management team has focused on establishing a successful working environment and employee culture.

Why is this interesting?

- The IPO gives public-market investors a new look at AZUL SA's category: , and all are motivated by the opportunity to participate in our MIP (as defined below), which we believe aligns shareholders? and management?s interests. Our management team has focused on establishing a successful w...
- The filing did not surface a clean market-size paragraph in the parsed excerpt, so the category angle needs a manual read of the prospectus summary.

Their traction so far

- The parsed filing text did not disclose clean customer, deployment, backlog, contract, or geography metrics.

The financials are tiny

	Metric	Latest parsed period	Prior parsed period	Change	Plain-English read
	---	---	---	---	---
	Revenue	\$5.0M	\$5.0M	+0.0%	Top-line sales disclosed in the selected filing.

Key risks

- Unprofitable: this should be checked directly in the risk factors and notes.
- Foreign issuer: this should be checked directly in the risk factors and notes.
- Repeated amendments: this should be checked directly in the risk factors and notes.

What happens to the balance sheet if the IPO works?

- Debt / indebtedness parsed from the filing: \$31.00.
- Use of proceeds: Use Of Proceeds The Selling Shareholders will receive all of the proceeds from the sale of our common shares, including in the form of ADSs, offered by this prospectus. We will not receive any of the proceeds from this offering. Dividends and.

Dilution: new investors are paying way above book value

- No clean IPO-price versus pro forma net tangible book value dilution table was extracted from the parsed text.

Also: capital structure / reverse split / other notable terms

- Reverse split: Presentation of Share Capital Information As described in this prospectus, since December 31, 2025, the Company has completed the First Reverse Share Split (as defined

below) and the Second Reverse Share Split.

- Foreign private issuer: The row/form indicates foreign-issuer treatment.
- ADS/ADR structure: Flagged in the filing text.
- Unprofitable: flagged by the filing parser.
- Foreign issuer: flagged by the filing parser.
- Repeated amendments: flagged by the filing parser.

My plain-English read

****Bull case****

- The bull case is that AZUL SA turns a public listing into enough capital and credibility to scale the business described in the filing.
- There is at least a disclosed revenue base: \$5.0M in the latest parsed period.
- Debt / indebtedness parsed from the filing: \$31.00.
- The story to underwrite is simple: , and all are motivated by the opportunity to participate in our MIP (as defined below), which we believe aligns shareholders' and management's interests. Our management team has focused on establishing a successful w...

****Bear case****

- No clean IPO-price versus pro forma net tangible book value dilution table was extracted from the parsed text.
- Unprofitable adds diligence risk.
- Reverse split: Presentation of Share Capital Information As described in this prospectus, since December 31, 2025, the Company has completed the First Reverse Share Split (as defined below) and the Second Reverse Share Split.

****Final key question:**** Is AZUL SA's growth and traction strong enough to justify the gap between the IPO price and book value?
