Their traction so far

- Disclosed traction: Although we have no business operations in mainland China, if such control were to extend to Hong Kong, or if by any case we were to become subject to such oversight or discretion in the future, it may restrict the ability of our Hong Kong Subsidiary to remit currency maintained in Hong Kong to non -Hong Kong entities in order for those entities to pay dividends or make other payments or otherwise satisfy their foreign -currency -denominated obligations.
- Disclosed traction: Under the new measures, the Chinese government will improve regulation of cross -border data flows and security, police illegal activity in the securities market and punish fraudulent securities issuances, market manipulation and insider trading.
- Disclosed traction: In the event that we inadvertently concluded that relevant permissions or approvals were not required or that applicable laws, regulations, or interpretations change and we are required to obtain such permissions or approvals in the future, any failure by us to maintain or obtain such permissions or approvals could result in enforcement and other action by the PRC government, including investigations, penalties, fines and orders, which action could significantly limit or completely hinder our ability to operate and offer or continue to offer securities to investors and could cause the value of such securities to significantly decline or be worthless.

- Disclosed traction: In order to continue controlling the outcome of such matters, holders of Class B ordinary shares must maintain at least 51% of the outstanding voting power.
- Disclosed traction: Strategic Partnership and Broad Network As a Web3 incubator, we have strengthened our capabilities in blockchain technology integration, business development for Web3 enterprises, and global market access through collaborations with our business partners, clients, collaborators, and other stakeholders in the Web3 ecosystem.

My plain-English read

****Bull case****

- The bull case is that Web3Labs Global Inc. turns a public listing into enough capital and credibility to scale the business described in the filing.
- There is at least a disclosed revenue base: \$30.00 in the latest parsed period.
- At the midpoint, the offering could add roughly \$531.00 before fees and expenses.
- Use of proceeds: USE OF PROCEEDS 54 DIVIDEND POLICY 55 CAPITALIZATION 56 DILUTION 58 ENFORCEABILITY OF CIVIL LIABILITIES 59 CORPORATE HISTORY AND STRUCTURE 61 MANAGEMENT?S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIO...
- The story to underwrite is simple: ? Implications of Being an Emerging Growth Company ,? and ? Prospectus Summary ? Implications of Being a Foreign Private Issuer.? Investing in our securities involves a high degree of risk. Before buying any Class A o...

****Bear case****

- At the \$4.50 midpoint, new investors are paying against disclosed pro forma net tangible book value per share of about \$31.00.
- Related-party transactions adds diligence risk.
- Reverse split: Flagged in the filing text.

****Final key question:**** Is Web3Labs Global Inc.'s growth and traction strong enough to justify the gap between the IPO price and book value?
